

CAPABILITIES STATEMENT

CHASM

Universal AI Chat Session Manager

THE PROBLEM

AI Conversation Data Loss

Enterprise Pain Points

- ◆ Chat history fragmented across editors, machines, providers
- ◆ Sessions lost on workspace change or system reinstall
- ◆ Zero audit trail for AI-assisted development
- ◆ Sensitive conversations untracked, unmanaged
- ◆ Copilot, Cursor, Claude, GPT — all siloed

Compliance Gap

- No DFARS compliance
- No CMMC coverage
- No FedRAMP path
- No NIST 800-171

IMPACT METRICS

47%

SESSIONS LOST

0%

AUDIT COVERAGE

\$2.3M

KNOWLEDGE LOSS/YR

5+

PROVIDERS/ORG

"We have no idea what AI helped us build last quarter."

— Enterprise Security Lead, Fortune 500

THE SOLUTION

Unified Session Management

CHASM harvests, merges, and manages AI chat sessions across all providers, platforms, and workspaces.

HARVEST

Extract from all sources

MERGE

Unify across workspaces

SEARCH

Full-text all history

AGENCY

Multi-agent orchestration

DEPLOYMENT

Single binary • Air-gapped • Container • Kubernetes

STORAGE

Local SQLite • Encrypted at rest • Full audit log

INTEGRATION

REST API • WebSocket • MCP Protocol • VS Code

ARCHITECTURE

Platform Overview

CLIENT PLATFORMS

CLI / TUI	Rust native
Web App	React 19 + Vite 7
Desktop	Tauri 2
Mobile	React Native
VS Code	Extension API

REST WS

CHASM CORE — RUST

DATABASE SQLite + FTS5	HARVEST Multi-Provider
AGENCY Agent ADK	PROTOCOL MCP Server

BINARY	MEMORY	STARTUP
5MB	< 50MB	< 100ms

COMMAND LINE

CLI

Power User Interface

DISCOVERY & RECOVERY

```
$ chasm list workspaces
$ chasm detect orphaned /project
$ chasm register all --force
$ chasm show path /secure-comms
```

HARVEST & SEARCH

```
$ chasm harvest run --provider copilot
$ chasm harvest search "auth bug"
$ chasm export json /backup/sessions.json
```

MULTI-PROVIDER MERGE

```
$ chasm merge providers copilot cursor
$ chasm merge path /secure/project
$ chasm merge workspace --all
```

AGENCY ADK

```
$ chasm agency list
$ chasm agency run --agent researcher \
  "Analyze security logs"
$ chasm agency run --orchestration swarm \
  "Build microservices"
```

API SERVER

```
$ chasm api serve --port 8787 --tls
```

CLI OUTPUT

Workspace Discovery & Agent Development Kit

```
chasm - List Workspaces

<span class="prompt">${</span> <span class="cmd">chasm list workspaces</span>

[D] coder
[V] reviewer
[E] executor
[W] writer
[T] tester
[X] custom
```

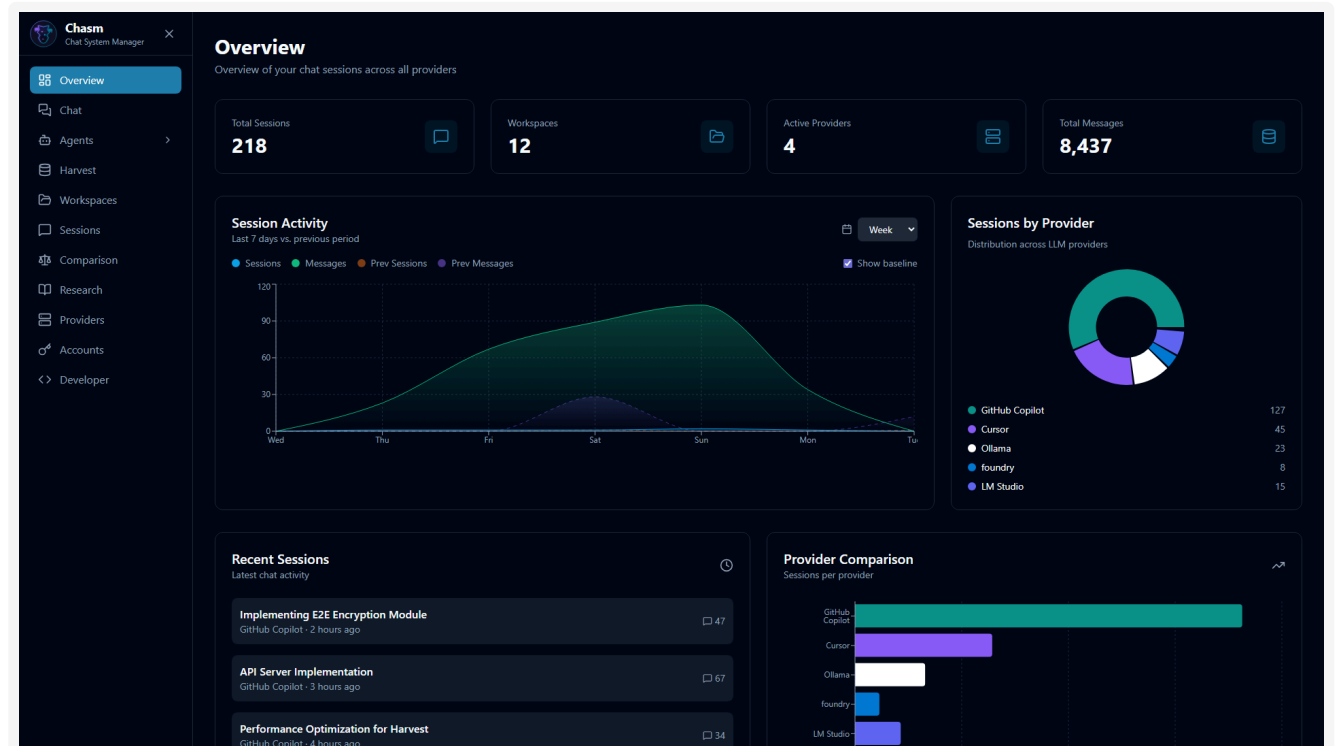

PLATFORMS

WEB APPLICATION

React 19 • Vite 7 • TailwindCSS 4

Features

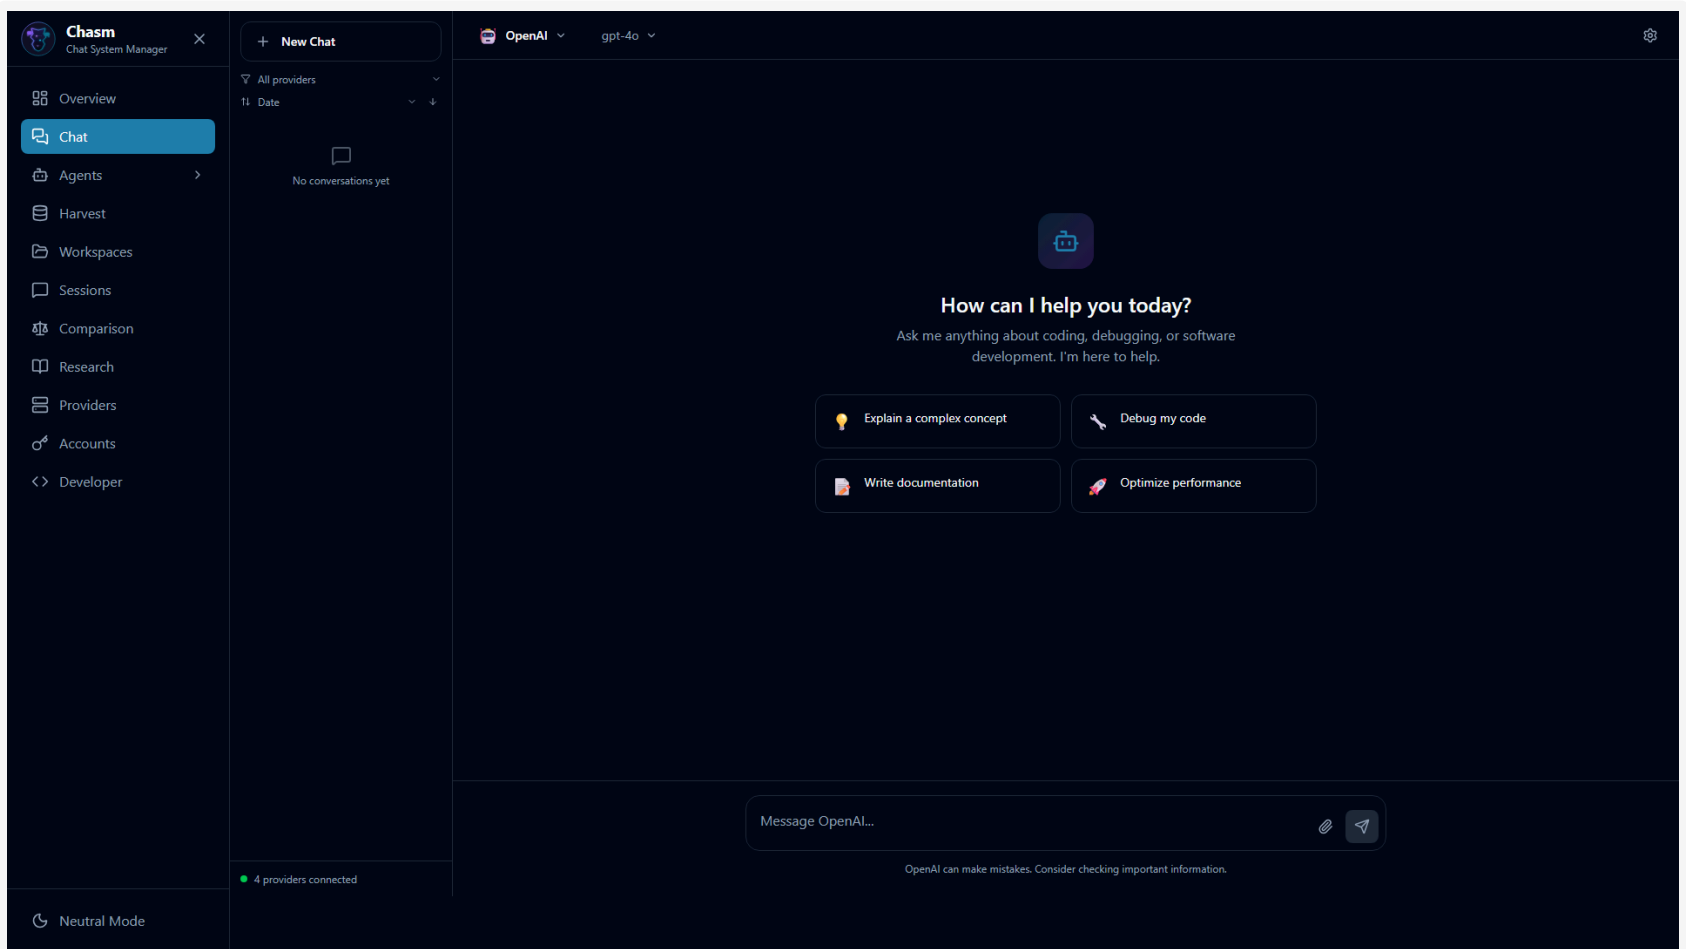

- Interactive chat with syntax highlighting
- Multi-agent workflow builder
- Session timeline visualization
- Full-text search with filters
- Provider management dashboard
- OAuth 2.0 / SAML authentication

WEB APPLICATION

Chat Interface

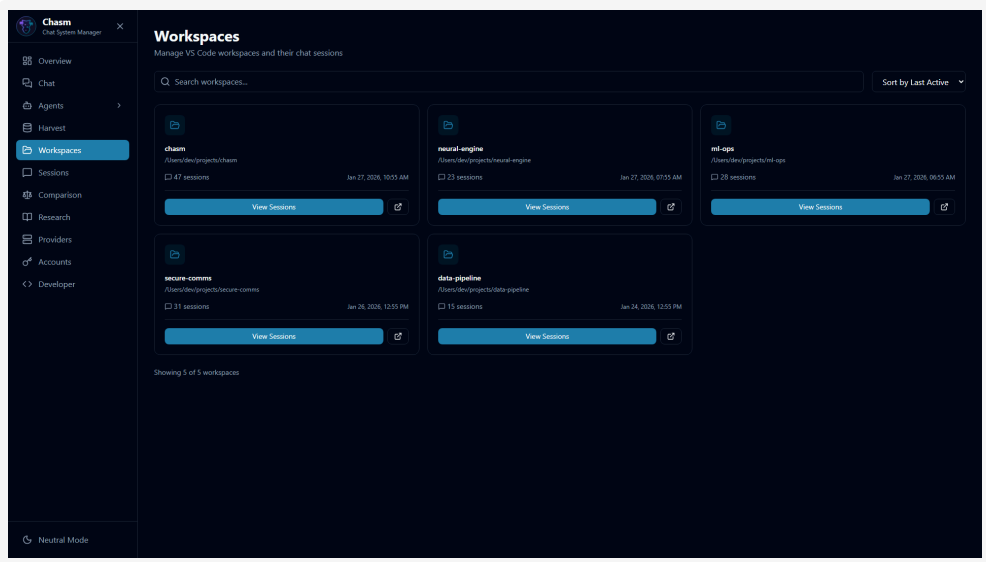

WEB APPLICATION

Sessions & Workspaces

Sessions View

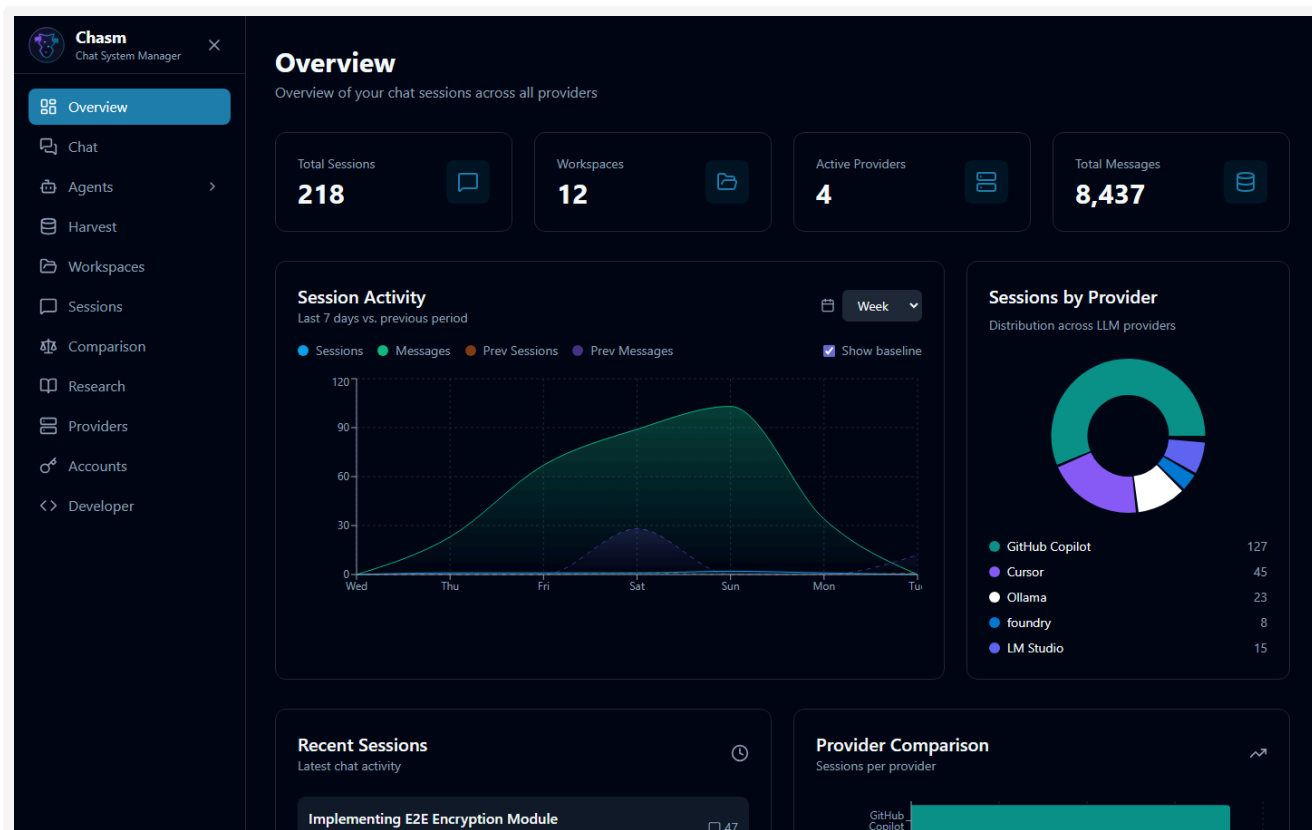

Workspaces View

DESKTOP APPLICATION

Tauri 2 • Rust • WebView2/WebKit

Features

- ~10MB binary (vs 150MB Electron)
- System tray with quick actions
- Native file dialogs & notifications
- Secure WebView sandbox
- Auto-updates with code signing
- Cross-platform: Win / Mac / Linux

MOBILE APPLICATION

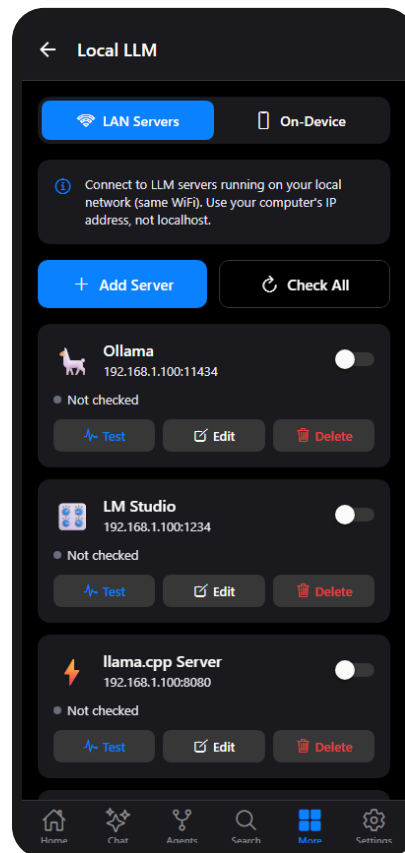

React Native • Expo • iOS & Android

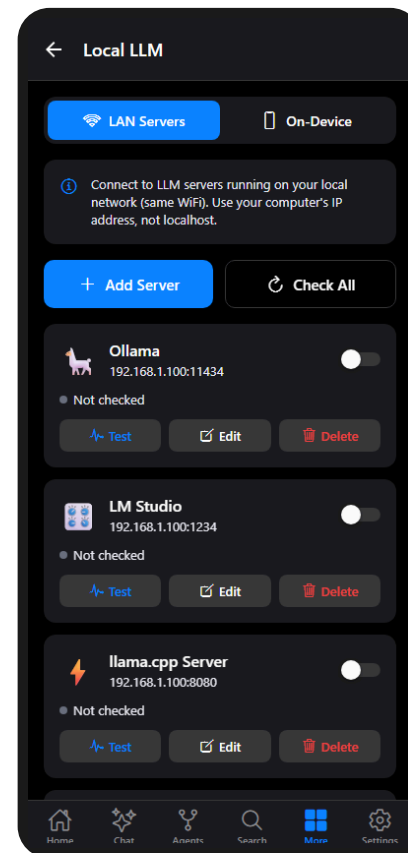

Home

Workspaces

Sessions

Chat

VS CODE EXTENSION

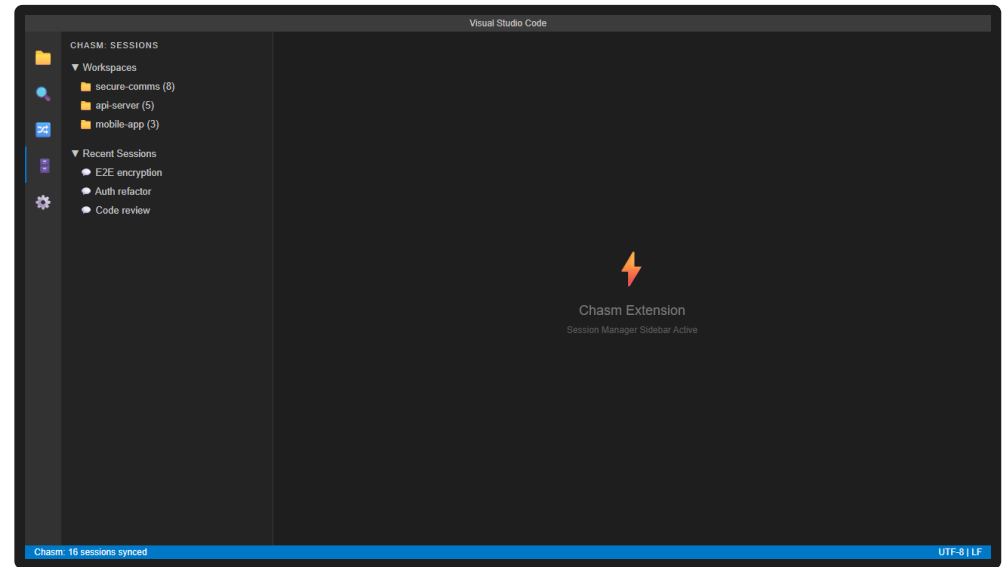

TypeScript • VS Code API

Features

- Sidebar panel for sessions
- Session recovery commands
- Git checkpoint integration
- Context menu actions
- Status bar indicators
- MCP server auto-start

Commands

Chasm: Show Sessions
Chasm: Recover Session
Chasm: Search History
Chasm: Start MCP Server
Chasm: Sync Workspace

RUST API

```
let swarm = Swarm::new(
    coordinator,
    vec![frontend, backend, tester]
);

let result = runtime
    .run_swarm(&swarm, "Build auth system")
    .await?;
```

CLI INTERFACE

```
$ chasm agency run \
  --orchestration swarm \
  --agents frontend,backend,tester \
  "Build authentication system"
```

SUPPORTED PROVIDERS

Universal Compatibility

IDE Assistants

- GitHub Copilot
- Cursor
- Windsurf
- Continue.dev
- Codeium

Local LLMs

- Ollama
- vLLM
- LM Studio
- LocalAI
- Jan

- Google / Gemini
- Azure OpenAI
- DeepSeek
- Mistral

SHARE LINK IMPORT — Paste ChatGPT, Claude, or Gemini share URLs to import conversations directly

SECURITY & COMPLIANCE

Enterprise-Grade Protection

Data Security

- ▶ **Local-First** All data stored on-premises in SQLite
- ▶ **Air-Gapped** Works fully disconnected from internet
- ▶ **Encrypted** SQLite encryption extension (AES-256)
- ▶ **Audit Trail** Full activity logging with timestamps
- ▶ **RBAC** Role-based access control

Compliance

- DFARS 252.227-7015
- FedRAMP Ready
- CMMC Level 2
- NIST 800-171

DEPLOYMENT OPTIONS

STANDALONE

Single binary, zero dependencies

```
$ chasm api serve --tls --port 8787
```

CONTAINER

Docker / Podman deployment

```
$ docker run ghcr.io/nervosys/chasm
```

ENTERPRISE

Kubernetes with HA, SSO, LDAP

```
$ helm install chasm nervosys/chasm
```

LICENSING

Flexible Options

COMMUNITY

Free

Open Source

- CLI + TUI
- Single user
- Local providers
- Basic search
- Community support

PROFESSIONAL

\$499_{/yr}

Per seat

- All platforms
- Team sharing
- Cloud providers
- Agency ADK
- Priority support

ENTERPRISE

Custom

- Unlimited seats
- SSO / LDAP
- Air-gapped deploy
- Custom integrations
- 24/7 SLA support

Government pricing available under GSA Schedule

WHY CHASM

Key Differentiators

- ◆ **Local-First** Data never leaves your infrastructure
- ◆ **Rust Performance** Sub-ms queries on millions of messages
- ◆ **Universal** Every provider, every platform, one tool
- ◆ **Agency Built-In** Multi-agent orchestration out of the box
- ◆ **Zero Dependencies** Single binary, instant deployment
- ◆ **Compliance Ready** DFARS, CMMC, FedRAMP, NIST 800-171

Platform Matrix

chasm-cli	Power users, automation, CI/CD
chasm-web	Browser-based dashboard
chasm-desktop	Native app, system integration
chasm-app	Mobile access iOS/Android
vscode-ext	IDE integration
